1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-47, 51, 53-84, 92-93, 96, drawn to an intelligent label and a method of making an intelligent label, classified in class 342, subclass 51.
  - II. Claims 48-50, 52, 85-91, 94-95, drawn to a method of tracking or identifying an object, classified in class 342, subclass 357.07.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of making an intelligent label. Invention II has separate utility such as a method of tracking or identifying an object.
3. Because these inventions are distinct for the reasons given above and the search required for group 1 is not required for group 2, and have acquired a separate status in the art because of their recognized divergent subject matter because making an intelligent label is different from tracking or identifying an object.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
